

SANCTURease

SANCTURease

SANCTURease incorporates all of the facilities of CHARITease, but also includes full Animal Management.

The screenshot shows the 'Main Menu' window of the SANCTURease software. The window title is 'Main Menu'. The interface includes the SANCTURease logo and the text 'JA Computer Solutions Ltd' and '© Copyright JA Computer Solutions Ltd 2004. Version 4'. The main menu consists of several buttons arranged in a grid:

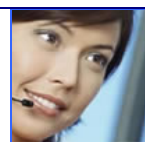

- Maintain Supporters (highlighted)
- Create Receipt Batches
- Print / Close Receipt Batches
- Post Batches to Accounts
- Print Letters From Batches
- Generate/ Print Tax Claim
- Post Regular Gifts
- Mailshots
- Find Animals
- Maintain Animals
- Animal Referral
- Generate Statistics
- Appointments
- Staff Rostering
- Check All Centre Animals
- View Kennel Locations
- Charity Details (dropdown)
- Maintain Users
- Maintain Details
- Query / Reporting
- Invoicing
- Web Update
- Lost Animals
- Homes Required

At the bottom, there is a warning message: "Warning: This computer program is protected by copyright law. Unauthorised reproduction or distribution of this program, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law." Below the warning, there are fields for "Registered To:" (containing "Demonstration Charity") and "Users:" (containing "2").

The main menu of SANCTURease displays the options available. There are two views in SANCTURease, a front office view which is tailored to meet the needs of the organisation and the back office view (shown above) which shows every option available.

JA Computer Solutions Ltd

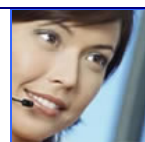

SANCTURease

Animals currently at the shelter can easily and quickly be identified by using the find form.

Reference	Date Arrived	Name	Centre	Sex	Breed	Type	Colour	Status	Release Date

*									

Each animal is given a reference on entry to the shelter and a status. The list of animals can be sorted by date, type, breed or reference.

By listing the animals currently at the shelter, full details can be viewed by double clicking the reference number.

SANCTURease

Each animal has an initial details screen where a name and basic details are recorded such as Breed and markings as well as microchip numbers.

Animal Initial Entry : Form

Main Details | Colourings / Notes | Clinic | Billing | Appt | Transfer Hist

ID: 124 Dangerous Dog Cruelty Case

Animal Name: zeb

Type: Cat Sex: Female

Date Created: Updated By: Admin ID: 124

Date Updated: 10/04/2005 Animal Name: zeb

Record: 1 of 17

Each visit to the shelter is then recorded against this screen so that if an animal returns to the shelter for any reason, their details can be selected rather than typing them in again.

Each stay is listed on the right of the screen so that you can keep track of any animals which prove to be problematic and keep returning back to the shelter.

SANCTURease

For each visit, full details are recorded against the animal. Where the animal came from, which kennel they are in, a picture and the date they are available for re-homing.

Date Updated: 15/11/2006 Animal Name: tara

Record: 1 of 1 (Filtered)

Each animal is allocated a status which determines if they are available for re-homing or if they are in isolation or not ready.

If you have a multi centre based organisation, animals can be allocated to a centre so that full details can be checked of every animal. Animals can also be transferred between centres.

By clicking the happy face button, details of Supporters who have registered an interest in this type of animal are displayed, enabling you to match animals to prospective owners. (You may have a request from a Supporter for a specific breed which you do not have in the shelter. When the breed is brought in, SANCTURease highlights the fact that a Supporter has requested notification of the breed)

SANCTURease

If the animal has any special feeding or medical requirements, these are also recorded.

Animal Entry - Find : Form

Record: 1 of 1 (Filtered)

These special requirements enable staff to make sure that prospective owners are made aware of any problems that the animal may have.

SANCTURease

Initial Medical details are recorded when the animal is brought into the shelter to enable an initial assessment to be carried out.

Animal Entry - Find : Form

Medical Notes: Very good health, well looked after
Date Created: 02/08/2004 Updated By: Admin
Date Updated: 15/11/2006 Animal Name: tara
Record: 1 of 1 (Filtered)

These details can be printed and included within a paper file if needed. (An animal maybe suffering from cruelty and a hard copy may be needed)

Medical notes can also be entered on this screen as well as details relating to any vaccinations, worming or flea treatments that have been carried out on the animal.

Initial assessments about the animal can also be recorded regarding the attitude and aggression of the animal.

SANCTURease

Facilities for recording ongoing medical details are also available.

Animal Entry - Find : Form

Date Updated: 15/11/2006 Animal Name: tara

Record: 1 of 1 (Filtered)

If the animal is undergoing a programme of treatment, details of the treatments are recorded so that a full history can be printed and given to the new owner so that they are aware of the treatments that the animal has had.

The weight of the animal can also be recorded on this screen as well as the vet who prescribed the treatment.

SANCTURease

Multiple observations can be recorded so that a profile of the animal can be built up. These observations can be of any nature. (For example, it may be that the animal barked at cats in the shelter)

Date Updated: 15/11/2006 Animal Name: tara

Record: 1 of 1 (Filtered)

Details of the date of the assessment, who carried it out and specific details of the assessment are recorded. These entries allow for a behaviourist to assess if the animal is struggling in a shelter environment or is improving.

If an animal starts to become destructive, it may be necessary to prescribe medication or to move the animal.

SANCTURease

Full kennel card production facilities are included. These are tailored to meet the needs of the organisation.

By printing kennel cards from SANCTURease, basic details relating to the animal can be posted onto the kennel so that prospective owners can see at a glance if the animal is good with children or other animals.

Notes can be entered by kennel staff and displayed to enable any specific details to be shown.

SANCTURease

Multiple assessments can also be entered against an animal allowing for an assessment profile to be built up.

Details relating to the general character, toys and games, food, handling and grooming etc can be recorded.

This allows for training assessments to be produced for an animal.

It may be necessary to monitor an animal if they stop eating their food, the assessment details allow this to be monitored.

SANCTURease

Full details relating to the colour of the animal can also be recorded allowing you to identify the animal.

A notes section allows for any specific details relating to the animal to be recorded. (e.g. blind in one eye)

SANCTURease

If an animal is referred to you, a full questionnaire can be entered and printed, along with documentation for the referrer to sign.

The screenshot shows a software window titled "Animal Entry - Find : Form" with a menu bar including "Main", "Special", "Init Med", "Ong Med", "Observe", "Behaviour", "Kennel", "Assess", "Basic", "Colours", "Appt", "Pictures", and "Referred". The main area is titled "QUESTIONNAIRE DETAILS" and contains the following fields:

Date of Enquiry:	15/11/2006	Allocation Status:	WAIT
Date Animal Seen:	15/11/2006	Visit Date:	15/11/2006
Visit Time:	10:00		
Handovers Name:	Mr Bloggs		
Handovers Address:	1 The Street		
Why did the owner not handover the animal?:	In Hospital		
Animal Background:			

Record: 1 of 1

Date Created: 02/08/2004 Updated By: Admin
Date Updated: 15/11/2006 Animal Name: Tara

Record: 1 of 1 (Filtered)

This questionnaire is tailored to meet the exact requirements of the organisation.

By recording details of the referral, a basic history of the animal can be recorded, allowing for potential new owners to be identified quickly and easily.

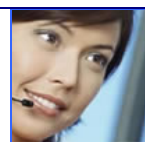

SANCTURease

Each animal is allocated a kennel and a full kennel location list is available showing the kennel and the animal in the kennel.

Kennel	Animal	Status	Sanctuary Ref	Arrival Date	
DP2	DOG PUPPY 2	gypsey	NEW	D/40/04	02/08/2004
DI22	DOG ISOLATION 22	tara	NEW	D/39/04	02/08/2004

If an animal is available, details of the person who is giving up the animal can be given to the prospective owner.

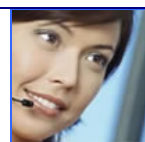

SANCTURease

If needed, SANCTURease can be linked to a website so that animals entered into the database can be flagged as available for the web site.

Full details are then automatically uploaded to the web site so that members of the public can see the animals.

SANCTURease

SANCTURease is tailored to produce documentation and reports, incorporating any logos or specific information.

With multi centre capabilities, SANCTURease can be networked across a WAN or LAN.

Each SANCTURease installation is thoroughly planned, with tailoring, implementation, training and on-going support.

If required, JA Computer Solutions will install hardware and setup networks to allow for multi centres.

To see the benefits of SANCTURease and how it can meet the needs of your organisation, please arrange a free on-site demonstration.

Call Jenny Owen on 0800 731 8764 to arrange a visit.
